

# PERCEPTION OF URBAN SPACE THROUGH THE EYES OF ELDERLY

Presented by Nimisha Karnatak  
Master Of Science, Digital Society, IIIT-B

Guide : Prof Saptarshi Kolay,  
Department of Architecture & Planning, IIT-Roorkee

6. Eye Tracking Technology  
of Built Environment

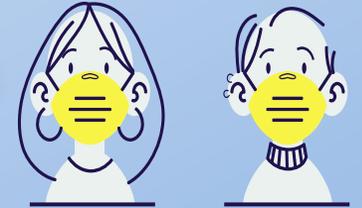

in partial fulfilment of the SPARK  
Internship Program 2020  
Of IIT-Roorkee

1. Elderly Inclusive  
Neighbourhood

5. Neighbourhood design  
of the Post COVID  
scenario

Objective: To understand the perception and need for the elderly living in an urban area in India and obtain design ideation for their active aging.

2. Imageability

3. Way Finding and Navigation

4. Spatial Cognition

## Literature Review

'Kallus et al.,2000

- Neighborhood' :
- dynamic and evolving concept
- no monolithic or frozen meaning

humanistic approach:  
'universal human phenomenon

instrumental approach:  
Neighbourhood is build

phenomenological approach:  
neighborhood as a cultural phenomenon

## Personas and Scenario

## Qualitative User Research

## Analysis Of User Research

## Design Ideation

### Idea of 'age-friendly neighborhood'

- In 2006, WHO developed a program to promote an age-friendly environment in cities.
- Age Friendly city:** "*encourages active aging by optimizing opportunities for health, participation, and security in order to enhance the quality of life as people age*" (Smith et.al, 2013) .

- Urban Spaces: mostly designed for younger people (Handler,2015)
- age-related communities?**  
"the places where older people are actively involved, valued and supported with infrastructure and services that effectively accommodate their needs" ( Alley et al., 2007).

### Spatial Cognition:

"a branch of cognitive psychology that studies how people acquire and use knowledge about their environment to determine where they are, how to obtain resources, and how to find their way home." (Waller et al. 2013)

•It determines:

- number of services used by the elderly individual,
- the distance of unique trips made by elderly,
- average length of these unique trips. (Waller et al. 2013)

### Eye Tracking: Study of the Built Environment

- popular tool for investigating spatial cognition (Kiefer et al., 2017)
- Enables to know : "where, when, how long, and in which sequence certain information in space or about space is looked at," (Kiefer et al., 2017)
- allows urban planners to design better spatial representations and optimal placement of sign

**Imageability** is a measure of how easily a physical object, word or environment will evoke a clear mental image in the mind of any person observing it.

# Personas and Scenario

Image Source : Jettyimages.com

Created :

- 5 personas and
- 5 scenarios

## Problems Highlighted:

1. Power cuts and Lifts
2. Unavailability of Public Transportation due to COVID-19
3. Skeptical of the quality of online services for milk and vegetables
4. Unavailability of household help/maids in COVID-19
5. Less mingling with the neighbourhood
6. Shifting to a new place and finding hard to adapt.
7. Prohibition to go to public place like parks and place of worships
8. Medical appointments disturbed because of COVID-19

Name: Nelson

Persona and Scenario

Age: 70

Profession - A retired employee of MNC  
Place: Uttar Pradesh

Nelson is a retired employee of an MNC, who lives in Sunshine colony, Hyderabad. Nelson has been living in the same apartment for ten years. Nelson is a divorcee and lives alone. He has two children, Ariel and Naman. Ariel is a married working woman who lives in Chennai while Naman, who is pursuing his Ph.D., lives in Pune. His children rarely visit him. Nelson's apartment is on the 8th floor of his building. Whenever there is a power cut, Nelson is not able to use the elevator of his building and he has to opt for stairs if the work is urgent. Nelson visits the church every Sunday but faces a lot of difficulties when the lift stops working or the electricity cuts off. Earlier, he used to drive his own vehicle, but he was diagnosed with cataract two years back, and so he uses public transport for going to church. However, because of COVID-19, public transport is not in use in order to contain the virus, and Nelson is left with no choice. He has a market very close to his society, so he often buys essential and groceries in bulk, but going to church and meeting his friends there is restricted, at least until the situation becomes normal.

Sudha Kumari  
Age 65, Female  
Housewife

- 2 sons, both live in foreign country
- Husband has problem walking for long distance

### Challenges:

- Cant use public transport to go for shopping because of COVID 19
- Has to carry heavy bags

### Goals:

1. Want to use public transport like pre-COVID19 times
2. Want to use online delivery without the fear of catching COVID-19/ Skeptical of the quality too.

Ajay Haldua

Age 71, Retired Principle  
•wife passed away in dec 2019: chronic illness  
•Living with son Sushant and daughter in law Priya since Jan 2020

### Challenges:

- Adapting to a new place after living 40 years in Noida
- Earlier: park for evening and morning walk – cant: COVID-19
- WFH: son and Daughter-in-law more busy (to save their jobs)

### Goals:

Outing and quality time with family

Savitri Singh  
Age 57, Female  
Housewife

- Lives with her husband
- Rekha, housekeeper do dishes, booming, mopping, dusting in the house
- Love talking to children of fellow flatmates

### Challenges:

- Lack of household help in the time of COVID-19
- Feels lonely, since parents don't allow children to go out

### Goals:

1. Want help from someone to reduce her workload (**ask husband to contribute**)
2. Want to meet children of fellow flatmates, as she enjoyed their company (**video call**)

# User Research Methodology

10 sections

total question = 65, Respondents = 58

- Qualitative & Quantitative Research using survey
- Recruitment of the participants
- Participant Information Boucher:

Types of Questions

- MCQ
- Likert scale
- Short answer type
- long answer type

Section 1 of 11

## Perception Of Urban Space

Greetings! As part of Human-Computer Interaction research, Prof Saptrashi Kolay of IIT-Roorkee and Nimisha Karnatak (student of MSc Digital Society at IIIT-B) are studying the perception of space through the eyes of the elderly.

The project aims at the heuristic evaluation of urban space, based on the perception of the elderly population. This research work will conduct the behavioural study using Eye-Tracking technology and will focus on the analysis of spatial cognition and eye fixation data. Our aim is to come up with the design ideation of an inclusive neighborhood for the elderly.

Please read the participant information broucher for more details -  
[https://docs.google.com/document/d/16qPaLD2rsKk\\_R4wDNoOeRiCwAYKC2KFc/edit](https://docs.google.com/document/d/16qPaLD2rsKk_R4wDNoOeRiCwAYKC2KFc/edit)

This form has short answer type questions, drop-down questions, and Multiple choice questions. In the questions where a scale is given from 1 to 5, in those questions 1 = least and 5 = maximum.

### Participant Information Brochure

**Project Title: Perception Of Space Through The Eyes Of Elderly**

#### Invitation

Greetings! As part of Human-Computer Interaction research, Prof Saptrashi Kolay of IIT-Roorkee and Nimisha Karnatak (student of MSc Digital Society at IIIT-B) are studying the perception of space through the eyes of the elderly.

The project aims at the heuristic evaluation of urban space, based on the perception of the elderly population. This research work will conduct the behavioral study using Eye-Tracking technology and will focus on the analysis of spatial cognition and eye fixation data. Our aim is to come up with the design ideation of an inclusive neighborhood for the elderly.

We invite you to actively participate in the:  
Qualitative Research: We will be circulating online questionnaires written on google docs on your preferred medium: WhatsApp, Gmail, or any other medium, based on your preference.

Before you decide to take part, please read this information.

#### Do I have to take part?

Participation is entirely voluntary. You are able to withdraw your contribution at any stage without giving a reason. If you decide to withdraw it, please let Nimisha Karnatak know at [Nimisha.Karnatak@iiitb.org](mailto:Nimisha.Karnatak@iiitb.org)

### Activity consent

By taking part in the research you are allowing your responses to be recorded as part of the research project. The response of participants will never be used for profit and we will always ensure that your views and ideas are accurately represented. You can choose to be either anonymous or recognizable throughout your participation.

#### • Being anonymous

Your identity will be completely anonymous and confidential. No identifying information of the participant will be linked to the research. If we include your responses in papers, articles, and presentations, we will make sure that your identity remains anonymized.

#### • Being recognizable

You can also choose to be recognizable. In that case, we might use your responses with your real name text in papers, articles, and presentations.

# Questionnaire Details

## Demographic Details:

- Name
- Age
- Gender
- Marital Status
- Current Place
- Type of Building,
- Number of people in house
- City of Origin
- Mother tongue
- Highest level of education
- Profession

## Accessibility:

- Public Transportation (availability and level of satisfaction)
- Roads condition (Level of satisfaction, problems, footpath availability)
- Water logging
- Assistive device used, if any
- Lightning and illumination

**10 sections**  
**total question = 65**

## Safety and Crime:

- Definition of safe neighbourhood
- Ever felt unsafe?
- Stray animals: and provision of neighbourhood
- Older person being attacked by stray animal

## Mobility in the neighbourhood:

- How elderly socialise with neighbourhood
- How often they go out
- Nature of visits
- Parks, Libraries, Community Centre, Place of worship
- Daily mode of transportation

## Cleanliness and Greeneries:

- Satisfaction with cleanliness of the neighbourhood
- Suggestions to make neighbourhood more green and clean
- Problems regarding the cleanliness
- Allocated garbage dumping areas

## •Society Disorder/Social Order :

- Ever felt threatened in neighbourhood
- Neighbours helpful?
- Rate of crime?
- Whom do you call in emergency; how far this person live
- Person with whom you share your thought
- Level of satisfaction with Police law

## Way finding and Navigation:

- Roads easy to cross?
- How often help is required to cross road?
- Condition of Traffic Congestion
- Availability of resting space when get tired of walking like benches, sidewalk, near a tree shade, culvert
- Public facilities like : public toilet, schools, small retail shop in neighbourhood?

## Medical Facilities:

- How far is the hospital ?
- Mode of transportation to go to hospital
- Medical facilities your nearest hospital have
- Patients referred to other hospitals?
- Hospitals near you have beds and ventilators for COVID-19
- How far is the COVID-19 hospital
- Medical appointment disturbed because of COVID-19

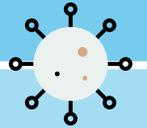

## The Air Quality of Urban Space:

- Effect of air quality on health
- Patient or symptoms of any airborne disease

## COVID-19 effect :

- Your zone: **R, O, G**
- Effect on mental, physical, social life, daily schedule.
- Helplessness during COVID-19; Fear of catching COVID-19, close one got infected with COVID
- Community initiative to keep up the spirit during COVID 19
- Lack of household help
- Effect on Public Transportation
- Sanitizer and mask or essential product availability
- Use of home delivery services

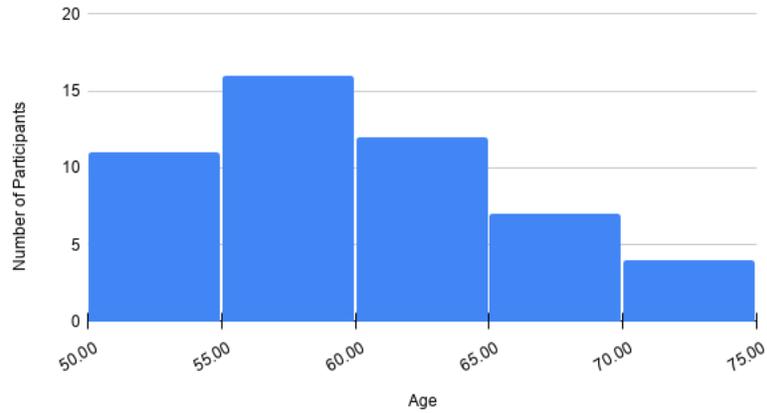

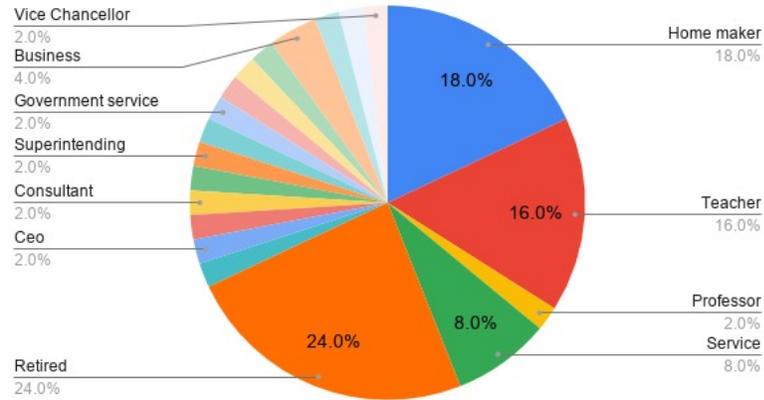

# Data Analysis

## Demographic Details

Histogram of Age

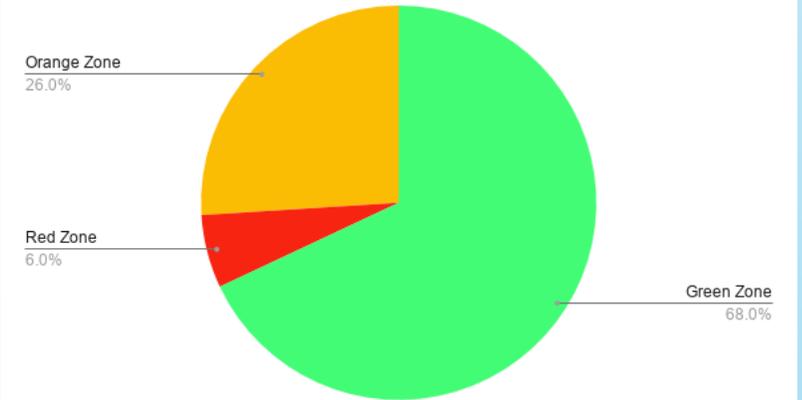

Profession

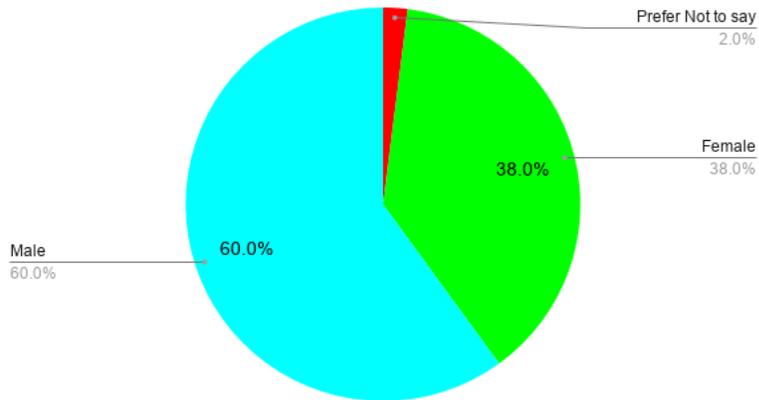

## COVID-19 specific

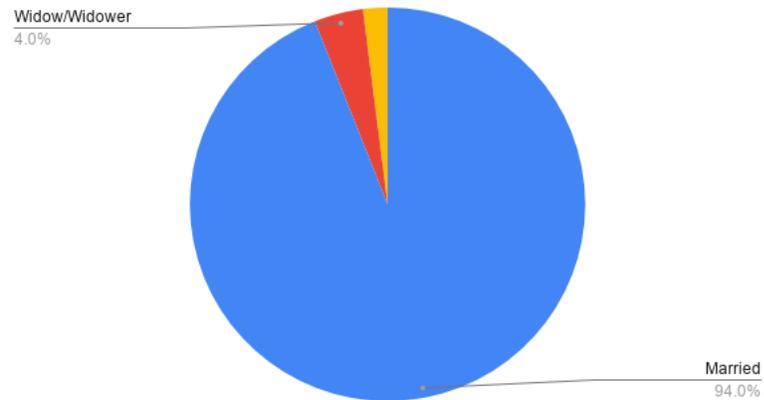

Red/Green/Orange Zone

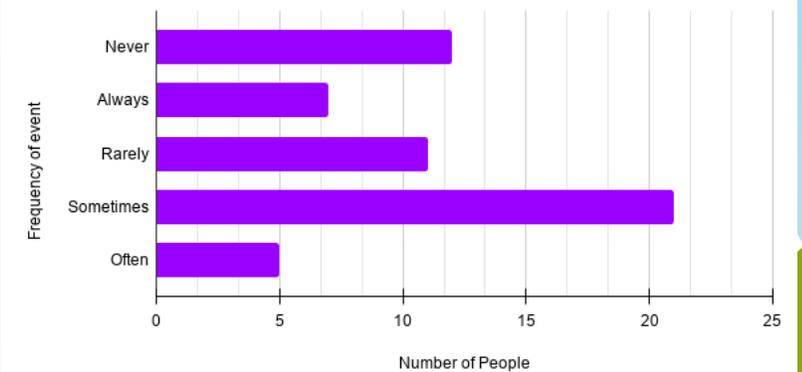

Gender

Count of Marital Status

Sanitizers, masks, or other essential products sold at price above MRP?

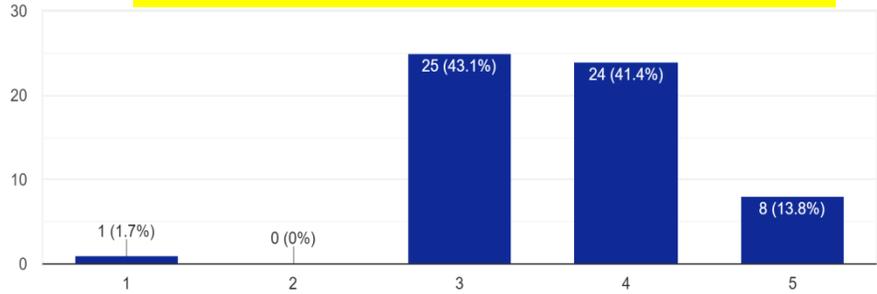

# COVID-19 Specific

Are you paying more attention to your mental health after the COVID-19 pandemic?

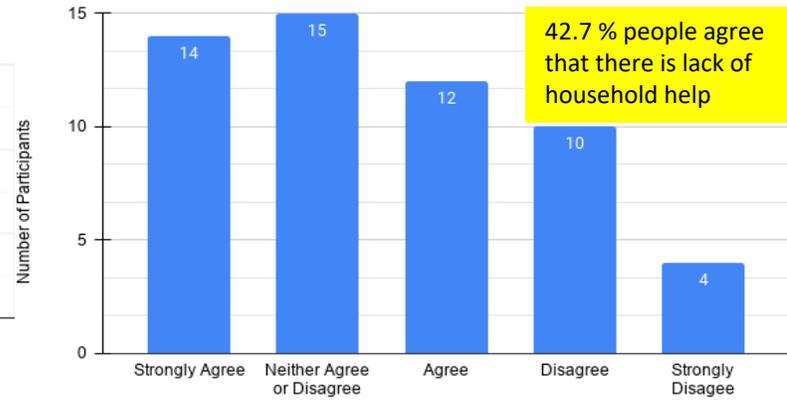

58 responses

55.2 % people: paying more attention to mental health

1= much less than before, 2= less than before, 3= unchanged/same as before, 4= increased than before, 5= much increased than before

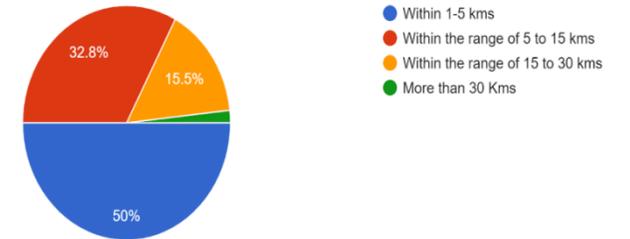

There is a lack of household help during the time of COVID-19.

42.7 % people agree that there is lack of household help

How far you have to go from your place to find a hospital that has facilities for the treatment of COVID-19?

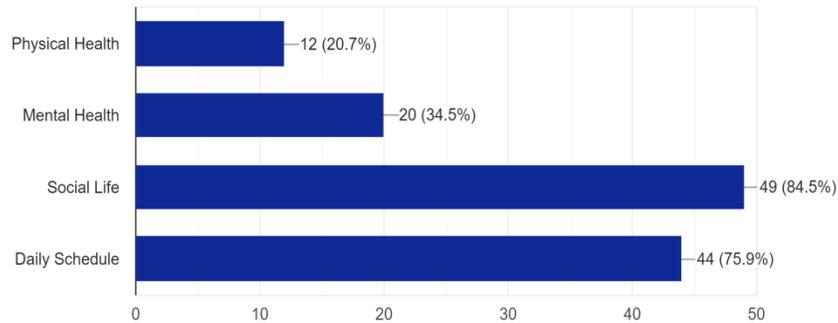

58 responses

- Within 1-5 kms
- Within the range of 5 to 15 kms
- Within the range of 15 to 30 kms
- More than 30 Kms

How has your life changed after COVID-19?

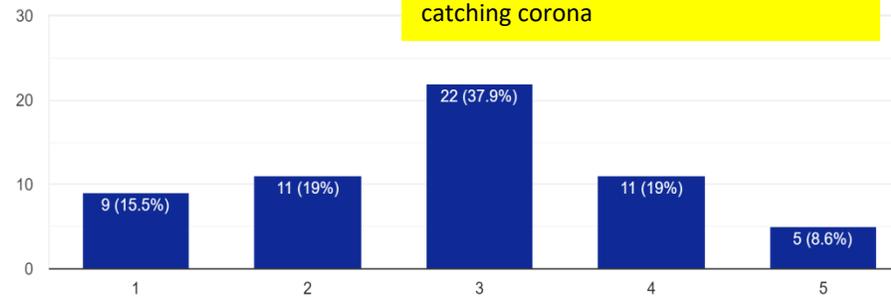

58 responses

Do you fear that you might catch coronavirus too?

58 responses

26.5 % fear often or always about catching corona

1 = Always, 2= Often, 3 =Sometimes, 4= Rarely, 5= Never

# Some Important Statistics

## Satisfaction with the way potholes are maintained in the neighbourhood

15.5 % : very unsatisfied  
32.8 %: unsatisfied  
27.6 %: Neutral  
19 % : satisfied  
5.2 % : very satisfied

47 % are unsatisfied

## Satisfaction with the number of benches or sitting space in neighbourhood

17.2 % : Very Unsatisfied  
24.1 % :Unsatisfied  
17.2 % : Neutral  
22.4 % : Satisfied  
19.00 % :Very Satisfied

41.3 % are unsatisfied

Patient referred to another hospital because could not be treated in the neighbourhood hospital:

12.1 % Always  
19.0 % Often  
11.0% Sometimes  
24.1 % Rarely  
25.9 % Never

31.1 % people said patients are "often or always" referred to other hospital

## Is there a foot path in the neighbourhood?

50.9 %: No  
49.1 %: Yes

50.9 % : NO

## Neighbourhood is well illuminated even during night

13.8 % : Strongly Disagree  
24.1 % : Disagree  
22.4 % : Neither Agree or Disagree  
25.9% : Agree  
13.8 % Strongly Agree

37.9 % disagree

## Water logging issue in neighbourhood?

51.7 % Yes  
48.3 % No

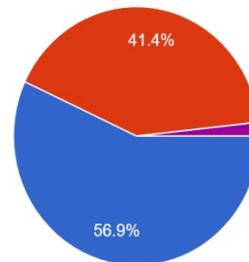

51.7% :YES

## Satisfaction with the condition of footpath

33.90 %: Very Unsatisfied  
19.96 % :Unsatisfied  
19.96 %:Neutral  
21.40 %: Satisfied  
5.400 %: Very Satisfied

53.86 % : Unsatisfied

How far is the hospital from your house?  
58 responses

- with 1 km range
- within 5-10 km range
- within 10-50 km range
- greater than 50km range
- 30km

41.4 %: 5-10 km range  
56.9 % : within 1 km

## Respondent says:

- “No specialist in my hospital”
- “Only first aid is given in my hospital”
- “Our city do not have advance and latest medical facilities. All critical cases related to heart, accidents and major surgery are always referred to higher centers.”

Topic	General	Elder						
<b>Changes to make public transport more accessible</b>	<ul style="list-style-type: none"> <li>•Increased Frequency of public transportation to reduce waiting time (more vehicles too)</li> <li>•Availability at call (Authorities to arrange number)</li> <li>•<b>Small sized public transport vehicles for interior parts of the city</b></li> <li>•More public transport In hilly areas</li> <li>•Clean, well-maintained and pocket friendly</li> <li>•On-Time Bus</li> </ul>	<ul style="list-style-type: none"> <li>•<b>Last mile connectivity.</b></li> <li>•<b>Ramp is required In buses/train/metros</b></li> <li>•<b>Availability of E-rickshaw in the society for older people to go out of gate</b></li> </ul> <div data-bbox="1574 357 2196 502" style="background-color: yellow; padding: 5px;"> <p><b>Respondent says</b>            "More e-rickshaws should be available as it's a society in which I live so it takes good 5-10mins to reach to the main gate of the society. "</p> </div> <ul style="list-style-type: none"> <li>•Priority for elders in public transportation</li> <li>•<b>Low foot stand, to enable easy entry in public transportation</b></li> </ul>						
<b>Roads</b>	<ul style="list-style-type: none"> <li>•Timely Maintenance of roads and potholes</li> </ul> <div data-bbox="504 716 1345 763" style="background-color: yellow; padding: 5px;"> <p>A respondent says: There is no maintenance of road since last 15 years</p> </div> <ul style="list-style-type: none"> <li>•Maintenance of road prior to rainy season</li> </ul>	<ul style="list-style-type: none"> <li>•Construction and maintenance of footpaths</li> <li>•Increase in number of sitting spaces like benches in neighbourhood</li> <li>•Well- illuminated especially during night</li> <li>•Proper signage (spatial cognition)</li> </ul>						
<b>Safe Neighbourhood</b>	<ul style="list-style-type: none"> <li>•Well Lit</li> <li>•Security Guard and frequent police patrolling especially at night</li> <li>•CCTV Surveillance and Burglary Alarm</li> <li>•Proper verification of vehicle before entering the premise</li> <li>•Adherence to traffic rules</li> <li>•Electricity 24*7</li> <li>•Restriction on Illegal vendor and non-verified tenants</li> <li>•Timely availability of ambulance</li> <li>•Free from interference of wild animal</li> <li>•Well maintained road to avoid accident</li> <li>•Timely availability of ambulance</li> </ul>	<div data-bbox="1452 935 2364 1082" style="background-color: yellow; padding: 5px;"> <p><b>A respondent says:</b>            "Monkeys are the main problem in this area. They damage kitchen garden and attack on human beings. We do not have any protection from them. Street dogs and nonmilching cows or male calfs damage kitchen garden some times"</p> </div> <div data-bbox="1452 1092 2170 1202" style="background-color: #f9f9f9; padding: 5px;"> <p><b>Another respondent says:</b>            Plenty of stray dogs which are scary for morning and evening walkers</p> </div> <div data-bbox="1617 1220 1949 1330" style="background-color: yellow; padding: 5px; text-align: center;"> <p><b>51.9 % : No</b>  <b>48.1 %: Yes</b></p> </div> <div data-bbox="2000 1113 2517 1413"> <p>You or someone older than you have been attacked by a stray animal?</p> <table border="1"> <thead> <tr> <th>Response</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>No</td> <td>51.9%</td> </tr> <tr> <td>Yes</td> <td>48.1%</td> </tr> </tbody> </table> </div>	Response	Percentage	No	51.9%	Yes	48.1%
Response	Percentage							
No	51.9%							
Yes	48.1%
